## Summary

---

Full Stack Developer with hands-on experience building scalable web and mobile applications. Specialized in React and React Native frontends, C# / Node.js backends, and AI-powered systems including RAG chatbots and NLP search. Strong foundation in agile methodologies (Scrum), clean architecture, and delivering high-quality solutions in startup environments. Passionate about continuous learning and impactful software.

## Experience

---

### Spire Software, Frontend / Full Stack Developer

Cochabamba, Bolivia  
Sept 2025 – present

- Development of web and mobile applications for digital platforms within a software startup.
- *MIIO 360*: Social e-commerce mobile app with live streaming implemented real-time streaming with interactive chat (Stream.io, Mux), image-based product search using Google Cloud Vision, and a TikTok-style social feed.
- *Domain: Online Learning Platform (similar to Coursera)*: Frontend role focused exclusively on implementing the course module experience; Visualization of courses and educational modules; Interface for educational content playback; Course navigation and management system. Technologies: React Native, TypeScript, Firebase
- *Salteñería El Hornito – Inventory Management System*: Developed a web-based inventory management system for a local food business; product and stock tracking, order management, and business reporting features. Technologies: React, Node.js
- *Coco Chatbot – WhatsApp Customer Service Chatbot*: Built a full automation chatbot integrated with WhatsApp for customer support and order processing; designed conversation flows, automated order intake, and integrated backend services for real-time order management. Technologies: React, Node.js, WhatsApp Business API

### Vargas & Asociados, Full Stack Developer

Cochabamba, Bolivia  
2025

- Developed a web-based identification, quotation, and legal process guidance system with an intelligent assistant for a law firm.
- Integrated a Spanish-language chatbot using Rasa to optimize user interaction and process recognition.
- Implemented Firebase Authentication for secure access and applied Scrum and unit testing.
- Technologies used: React.js, C#, PostgreSQL, Python, Firebase, Entity Framework, Docker, and Linear.

### Safa Software, Full Stack Developer

Cochabamba, Bolivia  
Mar 2024 – Sept 2024

- Frontend development and QA across two web platforms built with React.
- *FSociety – Video Game Tournament Platform (QA)*: Video game tournament organization system; Team and group creation and management; Bracket and matchup visualization; Interface for competition management. Technologies: React
- *TarjetaG – Virtual Business Card Platform (tarjetaG.com)*: Developed the complete landing page and core frontend of the application. Creation of personalized virtual cards; Card information and design editing; Sharing digital cards via links; Web interface for profile management.

Technologies: React

**Caredriver**, Full Stack Developer

Cochabamba, Bolivia  
Jan 2024 – Mar 2024

- Built a mobile application for professional driver services using React Native and Expo.
- Implemented user authentication, profile management, and Google Maps API integration for real-time tracking.
- Designed a service assignment system preventing race conditions and implemented background tasks for live location updates.
- Integrated Firebase for backend services and data synchronization.
