Summary

Frontend Developer focused on React, with a solid foundation in technical skills and agile methodologies, acquired through intensive training programs and hands-on experience. Demonstrates a strong commitment to continuous learning and delivering high-quality solutions.

Has actively participated in various educational and technical training sessions.

Completed the Mentor U program at Jala University, contributing 36 academic hours by teaching core subjects such as Databases I, Programming I, and Logic.

Also took part in the "Virtual Moodle and BigBlueButton workshop for students" (3 academic hours), organized by Proyecto JaqueMate, Fundación Jala, which provided valuable insights into virtual learning tools.

Experience

Developer | Full Stack Developer, Vargas & Asociados

2025 – 2025

React.js GitHub PostgreSQL C# Python Firebase Linear Figma Tools: Docker, Git, Visual Studio Code Frameworks: React, Entity-framework Third-party: Firebase Version Control: Github Project Management: Linear Project: Web-based identification, quote, and legal process guidance system with smart assistant. Case study at the Vargas & Associates Law Firm. Description: Developed a chatbot capable of recognizing different legal workflows and generating quotes for entire workflows and individual processes based on user needs.

- Developed a web system using React and RESTful APIs to manage legal workflows and quotations.
- Integrated a Spanish-language chatbot using Rasa to optimize user interaction.
- Implemented Firebase Authentication for secure user access and backend REST services.
- Applied Scrum for agile development and performed unit testing to validate requirements.

Full Stack Developer, Safa Software

03/2024 – 09/2024

Frontend development of modern web platforms using React.

Cochabamba

- Developed a video game tournament platform with team management and tournament brackets
- Built a platform for creating and sharing personalized virtual cards
- Implemented responsive user interfaces and reusable React components
- Integrated user management and platform interaction systems
- Improved application performance and overall user experience

Full Stack Developer, Caredriver

01/2024 – 03/2024

Development of a mobile application for professional driver services.

Cochabamba

- Built the mobile application using React Native and Expo
- Implemented user authentication and profile management
- Integrated Google Maps API for real-time driver tracking

- Designed a service assignment system preventing race conditions
- Implemented background tasks for real-time location updates
- Integrated Firebase for backend services and data synchronization

Frontend Developer, Spire Software

09/2025 – Present

Development of web and mobile applications for digital platforms.

- Developed a social e-commerce platform (MIIO 360) using React Native, TypeScript, and Firebase
- Implemented live streaming features with real-time user interaction using Stream.io [🔗](#) and Mux
- Built an online learning platform similar to Coursera for course management and video content
- Implemented product search using image recognition with Google Cloud Vision
- Integrated maps, push notifications, and real-time social features

Education

Bachelor's Degree in Commercial Software Engineering, Salesiana

2022 – 2025

Mentor, Mentor U program

2023 – 2023

The Mentor U Program at Jala University is designed to provide academic support to students through the guidance of mentor students who voluntarily contribute to the academic development of their peers in earlier courses. Participation details:

- Tutoring period: August 2023
- Hours dedicated: 3 hours

Subject: Programming 1

- Alignment: Following the course syllabus for the Software Engineering program.

Participation details:

- Tutoring period: September and October 2023
- Hours dedicated: 27 hours

Subject: Databases 1 Alignment: Following the course syllabus for the Software Engineering program. Participation details:

- Tutoring period: August 2023
- Hours dedicated: 6 hours

Subject: Logic

- Alignment: Following the course syllabus for the Software Engineering program.

Bachelor's Degree in humanities, Instituto Americano

2008 – 2021

Skills

Web Frameworks

React.js

Version Control

- GitHub
- GitLab

Databases

- PostgreSQL
- Firebase

Other Frameworks, Libraries, and Tools

- Node.js
- Figma

MySQL — Competent

Project Management, Defects, and Test Cases Tools

- Trello
- Linear

Programming, Scripting, and Markup Languages

- TypeScript
- C#
- Python
- HTML/CSS

Platforms

Linux

PostgreSQL — Competent

React Native — Competent
